

Mounir Abderrahmani

Senior Full-Stack Developer — E-commerce, Hospitality & Edge Platforms

Algeria (Remote) | mounir.webdev@gmail.com | +213 674 09 48 55
github.com/mounir1 | linkedin.com/in/mounir1badi | mounir1.github.io

PROFILE

Full-stack developer with 10+ years of shipped, verifiable work: a live Magento 2.4 storefront and Akeneo PIM 6 in production, an open-source suite of 28 Magento extensions, the front-end of a hospitality Property Management System (Nava PMS), and an edge-native platform on Cloudflare Workers. Strong on typed React/TypeScript front-ends, API integration, automated testing, and running production infrastructure end to end.

EXPERIENCE

Front-End Developer — Nava PMS (Hospitality)

HoTech · Contract · Remote — 2025 – Present

- Build core PMS screens including the Syncfusion-based Room Rack reservation timeline.
- Typed integration layer over the OREST hospitality API; MSW mocks for offline development.
- Automated testing with Vitest (unit) and Playwright (end-to-end).

Lead E-commerce & Platform Developer

Techno Stationery · Full-time · Algeria — 2022 – Present

- Operate the live Magento 2.4 store technostationery.com end to end.
- Deployed and administer Akeneo PIM 6 (PHP 8.3) as the central product-data hub.
- Authored the open-source MAB Modules suite — 28 Magento 2.4 extensions in production.
- Integrated Yalidine shipping: 165+ pickup centers across all 58 Algerian wilayas.
- Built the internal operations dashboard; own hosting, security, and deployments.

Founder & Architect — MabCoin / Mab Arena

Personal venture · Remote — Jul 2025 – Present

- Edge-native platform on Cloudflare Workers: Hono API, D1 (SQLite) persistence.
- MCP server exposing 12 tools for AI-agent integration; Telegram bot [@Mymabcoinbot](https://t.me/Mymabcoinbot).
- CI quality gate green across 89/89 automated checks.

Freelance Full-Stack Developer

Independent · Algeria / Remote — 2016 – 2021

- Delivered sites and web apps for local businesses — including nooralmaarifa.com (still live).
- Published JSKit (jskit-app.web.app), a Firebase-hosted developer toolkit.
- Grew from front-end builds into complete design–build–deploy–maintain delivery.

SELECTED PROJECTS

Nava PMS — Hospitality PMS front-end (React/TS, Syncfusion, OREST API).

MAB Modules Suite — 28 open-source Magento 2.4 extensions — mounirtms.github.io.

TechnoStationery.com — Production Magento 2.4 storefront, live in Algeria.

MabCoin / Mab Arena — Cloudflare Workers + Hono + D1; MCP server (12 tools); Telegram bot.

Akeneo PIM — Production PIM 6 deployment — pim.technostationery.com.

Portfolio + Admin CMS — React 18 + Firebase with full content management — mounir1.github.io.
